DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Abstract:

The two paragraphs of the Abstract are combined to form one paragraph. Line 10 previously read "effects of thermomechanical stresses." It will now read "effects of thermomechanical stresses. In another specific embodiment, which can be combined...."

Response to Amendment

The Amendment, filed on 1/12/2004, has been entered and acknowledged by the Examiner.

Claims 10-17 have been entered.

Claims 1-3 and 6-8 have been amended.

Allowable Subject Matter

1. Claims 1-3, 6-8, and 10-17 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Art Unit: 2879

Regarding claims 1, 6, 15, and 16, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claims 1, 6, 15, and 16, and specifically comprising the limitation of a Hall-current ion source with an electron-collecting surface that is contoured with a plurality of protrusions and recesses so as to increase the surface area by one-half.

Regarding claims 10-14, claims 10-14 are allowable for the reasons given in claim 1 because of their dependency status from claim 1.

Regarding claims 2, 3, 7, and 8, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claims 2, 3, 7, and 8, and specifically comprising the limitation of a Hall-current ion source with an electron-collecting surface that is contoured with a plurality of protrusions and recesses wherein about one-third of the surface area cannot be reached by a straight line originating from a point exterior of the ion source.

Regarding claim 17, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 17, and specifically comprising the limitation of a Hall-current ion source with an anode that has a plurality of conducting layers separated by a plurality of non-conducting layers wherein the non-conducting layers extend beyond the conducting layers.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
